

Case Study #2

Feature Focus: SD Card Data Logging with CAN Shark

Your portable solution for hands-free CAN data capture

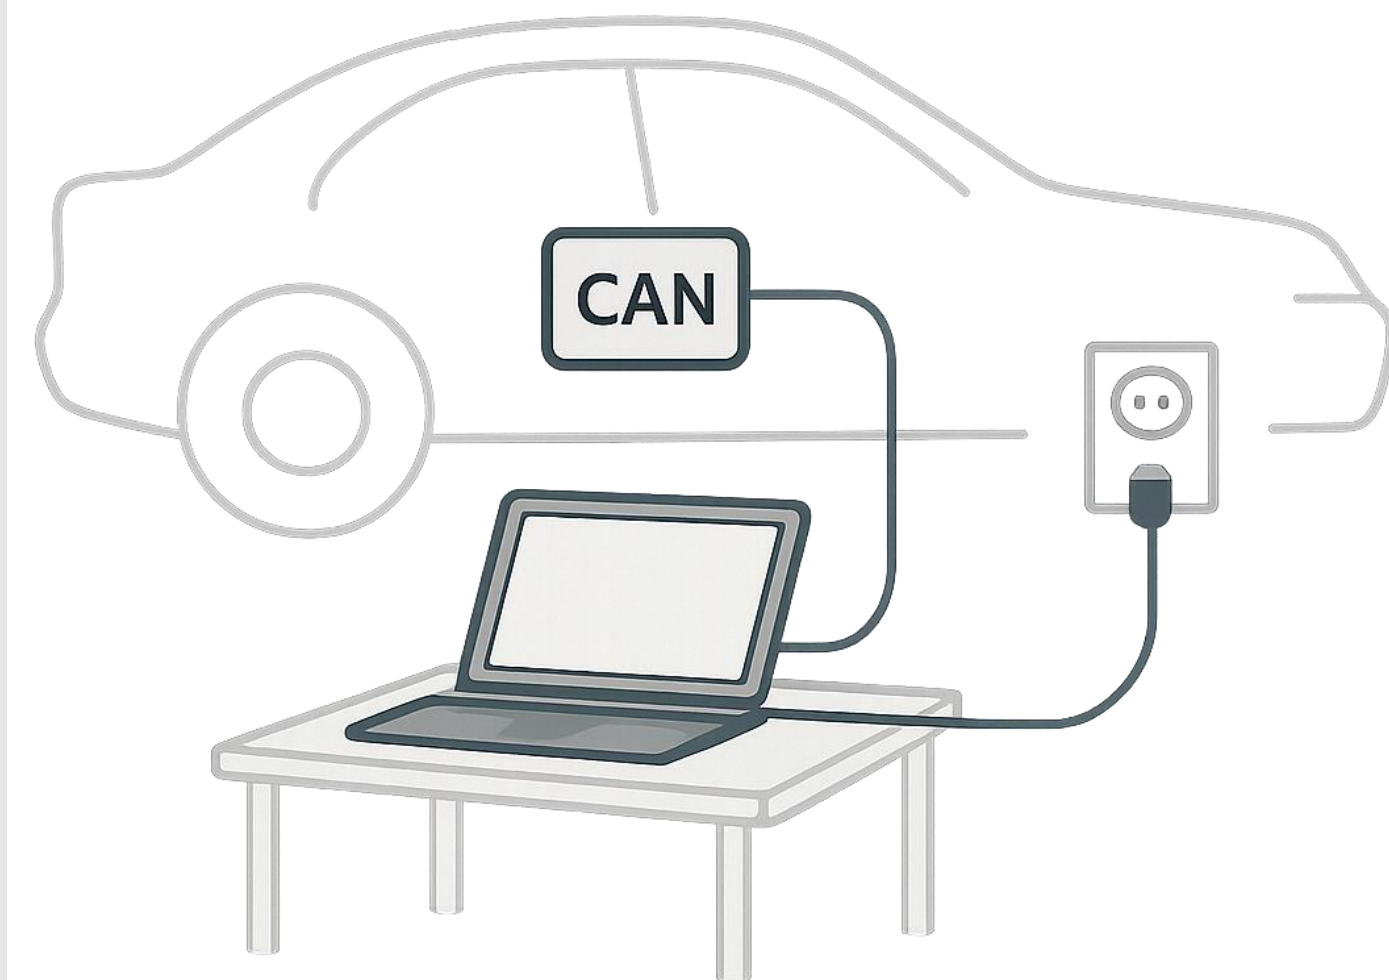

Capture CAN Data Without a
Laptop – Anywhere, Anytime.

The Problem

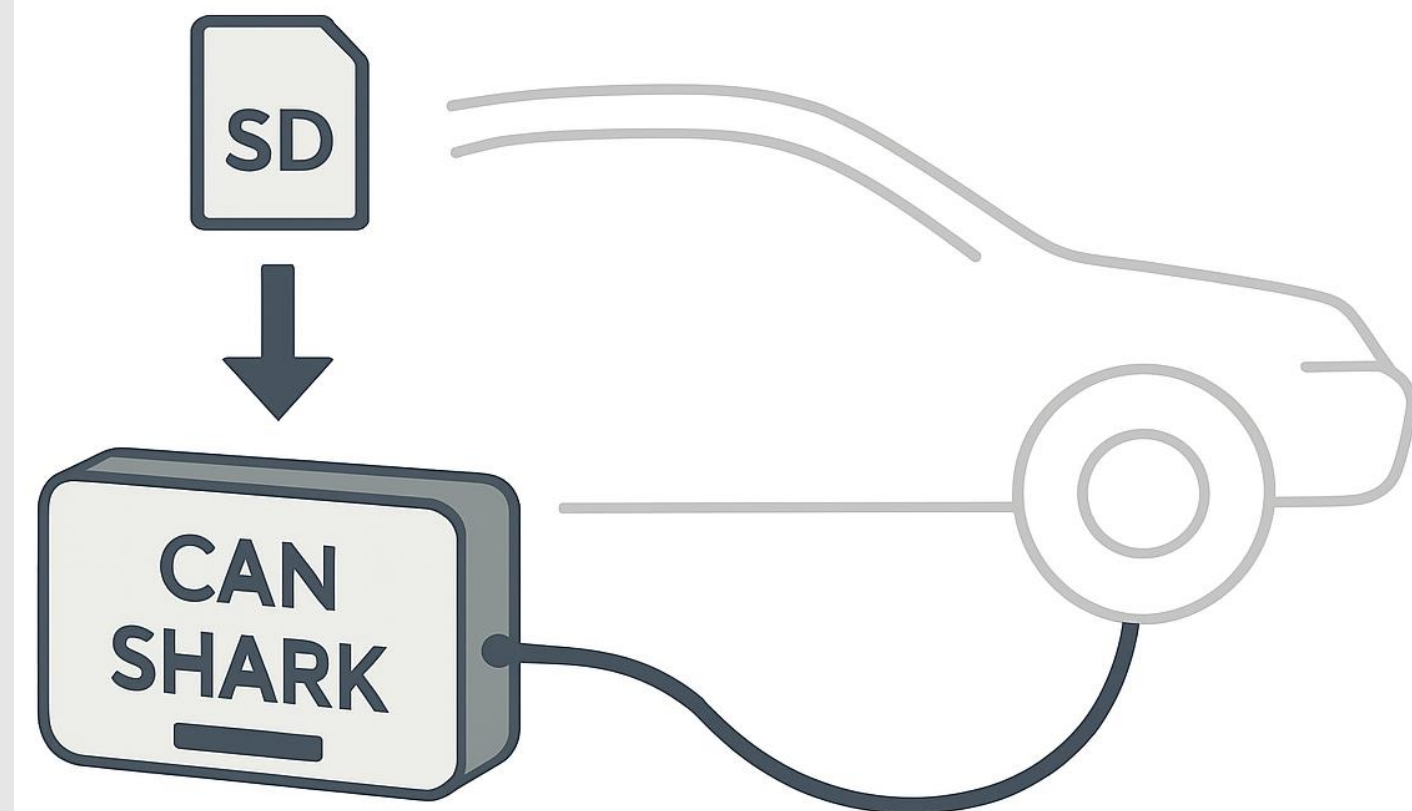

- Conventional CAN tools often require a PC connected at all times.
- Not practical for long-term testing
- Inconvenient during field trials or in-vehicle monitoring
- Power and portability challenges

The Solution

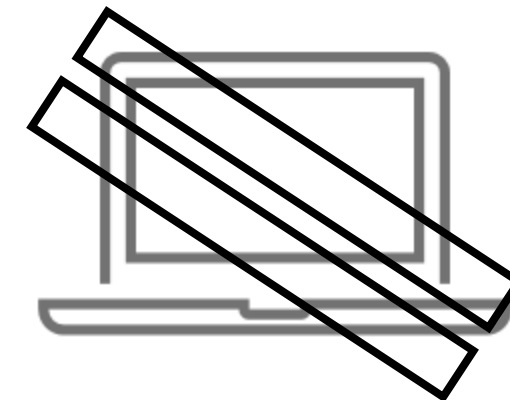

SD Card Logging

- Just configure once and plug in
- Logs all CAN traffic directly to SD card
- Ideal for on-road testing, remote diagnostics, endurance runs

Key Benefits

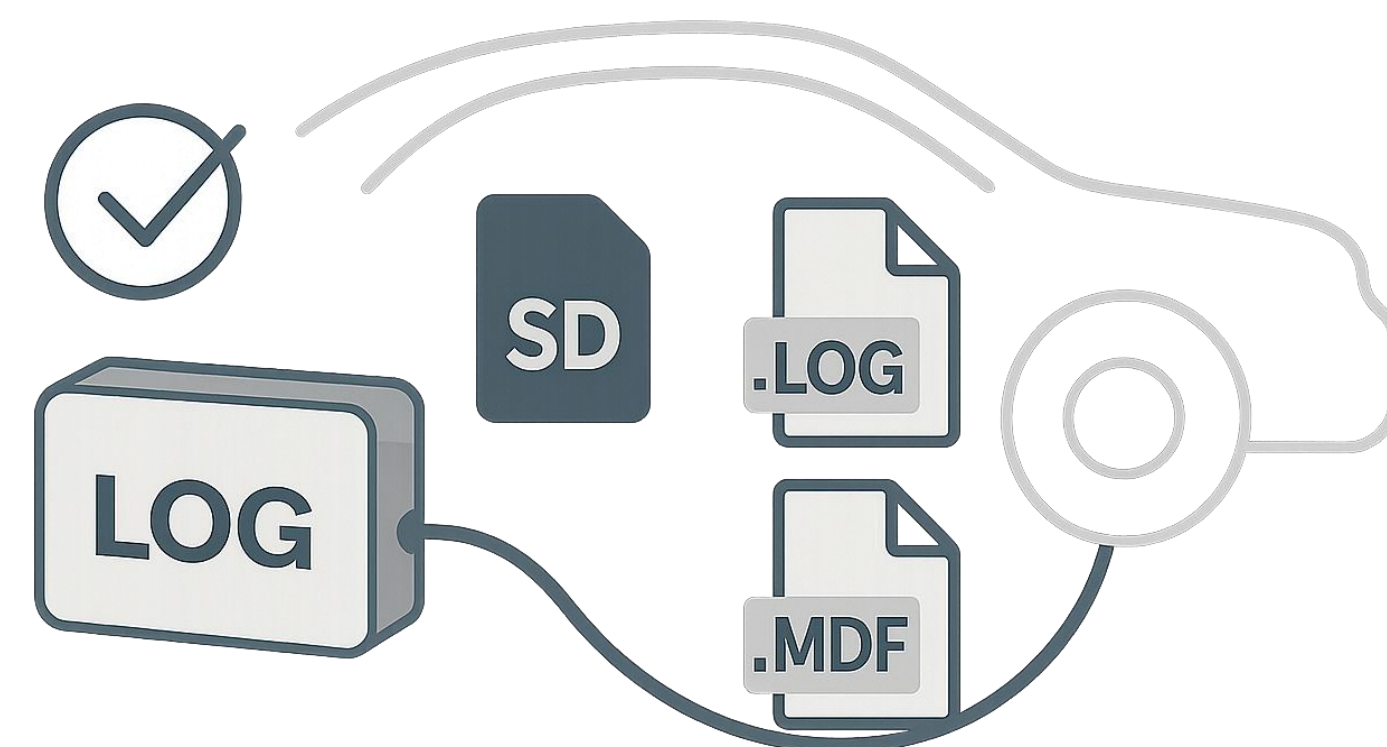

- ✓ No PC needed during logging
- ✓ Supports long-duration data capture
- ✓ Custom logging filters & settings
- ✓ Timestamped data in .log and .mdf for post processing

How It Works

Simple 3-Step Setup

1. Use the PC tool to configure logging options
2. Save the config to the device SD card
3. Plug CAN Shark into vehicle — and record!

Try CAN Shark in Your Next Field Trial

Portable, rugged, and reliable CAN analysis
